

# Northpointe Specialty Courts

Manage your treatment docket

Your court works hard to promote positive change while holding offenders responsible for their choices. As experts who specialize in RNR strategies and dynamic caseflow management, we stand ready to help with our Northpointe Specialty Courts software:

- Automatically determine program eligibility
- Perform validated risk/needs assessments
- Build meaningful case plans
- Capture treatments and tests
- Track progress, results, and outcomes
- Coordinate and collaborate with your team
- Communicate issues and progress

Northpointe Specialty Courts is an integrated software solution that manages all participant processing and case/court activities. It's completely scalable, affordable, and applicable for all types of treatment-focused dockets – from small, single-user systems to statewide implementations – and it easily interfaces with other case management systems for a seamless, easy-to-use solution. Because we understand your unique needs and challenges, Northpointe Specialty Courts is designed to support your court's primary goals:

- Providing the treatment and services that address core needs to help offenders stay clean and sober
- Holding people accountable for meeting their obligations to the court, society, themselves, and their families
- Reducing recidivism rates by breaking the cycle of crime
- Improving coordination between treatment services and the criminal justice system
- Promoting public safety

Case plans and activities are based on individual risks and needs for meaningful intervention.

“Northpointe Specialty Courts is an integrated software solution that manages all participant processing and case/court activities.”

**COMPAS Risk and Needs Assessments:** One of the most Scientifically Advanced Assessments available - allows you to easily select any combination of its 22 risk and needs scales to effectively and efficiently inform decisions. After selecting your scale combinations COMPAS saves them as custom "scale sets" for repeated use in the assessment wizard. The main COMPAS Bar Chart and accompanying Narrative Report provide for easy case interpretation. Numerous secondary assessment tools are also provided for mental health, PTSD, domestic violence, sex offender, etc.

The integrated Case Plan effectively links the efforts of case workers, participants, their family, and various collaborators like treatment providers, in order to facilitate a needs-driven treatment plan that provides the best chance for lasting success.

Set next court dates, track attendance, log and filter case progress notes, record court recommendations and actions, refer, enroll and track program participation, and handle many other activities with Offender and Case Tracking. Drug test results are managed manually or through an interface with your test lab. Treatment providers can securely access the system to enter progress notes and other information. Violations, graduated sanctions, rewards, and case outcomes are also tracked. Views can be personalized for all users and reports are easily created through the integrated report writer.

The Case Timeline and Workload Manager let you see case and person milestones and tasks on a graphical timeline. Quickly filter by event type to drill into specifics (assessments, plans, tests, court activities, etc.).

## A completely scalable and affordable solution
